

### **Administration of Emergency Epinephrine**

Training to administer emergency epinephrine is provided yearly for all staff during staff in-service days. Training will also be provided throughout the year on an as needed basis. Completion of training is tracked by the District Nurse. Training utilized the WI DPI approved course. Standing orders are maintained yearly authorizing the administration to students, regardless of current prescription for epinephrine, if they appear to be experiencing anaphylaxis. The District Nurse maintains stock Jr. and Full Dose EpiPens through the Epi Pens for Schools Program. Pens are stocked at the elementary school, middle school, and high school, in the emergency medication cupboard. This is pursuant to WI State Statute 118.29.
